All over the world, people are calling for a greener future. People want to breathe clean air and drink clean water. We want to protect our global climate. We want our children to enjoy a clean, healthy, natural environment.

ELAW connects people across borders and helps people around the world speak with strong voices and win victories for the environment. ELAW gives local lawyers the legal and scientific tools they need to:

1. Prevent pollution and challenge environmental abuses
2. Protect our global climate
3. Strengthen and enforce laws protecting the environment
4. Help citizens speak out for communities and the environment

At ELAW, we believe that grassroots attorneys working in their home countries are the key to building a sustainable future. That’s why we always work with committed local partners.

Advocates in more than 80 countries know they can call on ELAW for the help they need. Every year, citizen lawyers call on us for help with hundreds of efforts to protect communities and the environment. By empowering grassroots lawyers, we help win victories and build a worldwide corps of strong advocates for the environment.

We all share a single planet and we must build bridges across borders. At ELAW U.S., we are proud to work with courageous advocates all over the world. We are thrilled to welcome these advocates to Eugene, where we will learn, gain inspiration, and work together to craft a greener, more just future.
